Dreer's Autumn Gardening Guide Order Early

This year, more than ever before, it is very important that you place your order just as early as possible because the supply of many items is decidedly limited.

The dates given below necessarily must be approximate as they depend upon climatic conditions. Where winter sets in early, plant as soon as possible.

*Late August or September
is the best time to start a new
lawn or reseed the old one
See page 20.*

September

Plant bulbs of Colchicum just as soon as possible. The earlier they are planted now the better they will be. If you did not sow your new lawn or repair the old one during late August do so now or as soon as possible.

This is the most important month for planting bulbs in the garden to bloom next spring including Narcissus, Anemone, Brodiaea, Calochortus, Camassia, Erythronium, Leucojum, Lilium candidum, Eremurus, Muscari, Ranunculus, Scilla, Spring Starflower, (Triteleia), and Iris reticulata. Start Lilies indoors, also Calla, Freesia, Ixia, Lachenalia, Leucocoryne, Ornithogalum, and Sparaxis.

Where winter sets in early sow the seed of hardy perennials marked in this catalog*. Where winter is a long way off other quick growing perennials can still be started from seed.

October

All the bulbs recommended for September planting can still be started this month as long as the ground is not frozen. But even in colder sections October planting is possible where the soil in the beds has been covered with leaves, straw, corn stalks, or any other loose matter that will keep the frost out until the bulbs are available.

*October is the most important
month for planting Tulip bulbs.*

Just before the soil in the seed bed or cold frame freezes sow seed of the perennials marked with a * in this catalog.

By the middle of the month begin your first planting of Paper White Narcissus, Soleil d'Or Narcissus, and Chinese Sacred Lily indoors. Make sure you have sufficient bulbs of these to make succession plantings two weeks apart until mid-March. They will keep in good condition if stored in a cool but frostproof dark room. Set them upright in shallow boxes to keep the sprouts straight, using shredded paper to hold them in position. Also start Gloriosa, the beautiful Climbing Lily, indoors now. Late in the month plant Dutch Iris.

*This is the month to
plant hardy Lily bulbs.*

November

Continue planting Lilies throughout this month. There is still a chance to plant the many types of bulbs recommended for September and October planting as long as the ground is free from frost. Continue planting tender bulbs indoors for flowers during late winter and early spring.

December

Throughout December start bulbs of Paper White Narcissus, Soleil d'Or Narcissus, Chinese Sacred Lily, Amaryllis, and all tender bulbs for blooming indoors in the house.

Keep Your Home Gay and Cheerful Throughout the Winter with these Beautiful Giant-Flowering Narcissus

May we suggest that you secure sufficient bulbs of these to permit successive plantings made two weeks apart from late November until March.

Exquisite-Chalice-Cup or Medium-Trumpet Daffodils

The Chalice-Cup or Medium-Trumpet group of Daffodils or Narcissus includes some of the most beautiful varieties. In the *Incomparabilis* group the cup or crown is not less than $\frac{1}{3}$ of the perianth petals, whereas in the *Barri* group the cup is less than $\frac{1}{3}$ the length of the perianth segments. In the *Leedsii* group the size of the cup varies but the perianth always is white and the cup or crown is either white, cream, or has a pinkish tint. All of them are splendid for naturalizing because they are reliably hardy and they multiply more rapidly than those belonging to the Giant-Trumpet class. Those who have proper facilities will find them excellent also for growing in pots or pans. For best effect in the garden they should be planted in groups.

40-690 Bath's Flame (*Barri*). Long petaled, bright yellow perianth and a deep yellow cup with a broad edge of rich orange-scarlet. 3 for 45c; 12 for \$1.60; 25 for \$2.75; 100 for \$10.00.

40-696 Conspicuous (*Barri*). The perianth is soft yellow and the broad, spreading cup is magnificently illuminated with glistening orange-scarlet. Extra fine for the garden and for cutting. 3 for 45c; 12 for \$1.60; 25 for \$2.75; 100 for \$10.00.
